EDUCATION

Indiana University Bloomington | Luddy School of Informatics

Expected May 2029

B.S. in Informatics; Kelley Accounting & Business Minors

GPA: 3.5/4.0

EXPERIENCE

Software Engineering & Corporate Accounting Intern

May 2026 – August 2026

H.T. Hackney | \$4B+ Wholesale Distributor

Indianapolis, IN

- Caught a systemic formula error that had been overpaying tariff refunds by \$30K a year, found while processing refunds across 1,600+ containers and \$4M+ in total order value; the corrected formula now runs every refund cycle
- Created an Excel refund model and pivot analysis from raw invoice and container-level data, now used by the company president and senior executives to set item-level refund amounts and anchor negotiations with the largest accounts
- Valued \$500K+ in prepaid overseas inventory for month-end close by matching 300+ vendor invoices in Microsoft Dynamics, booking accruals across 20+ overseas vendors, and documenting each workflow so future interns can run close unaided
- Built a self-hosted internal e-commerce catalog in Next.js where employees buy furniture at wholesale prices

Machine Learning Research Assistant

April 2026 – Present

University of Indianapolis | MBA Artificial Intelligence Laboratory

Indianapolis, IN

- Ran 1 of 2 M&A research tracks under Dr. Craig Seidelson, computing 15 risk and solvency ratios across 50+ acquisitions
- Applied entropy-based information-gain feature selection across 30 financial variables to rank the 5 strongest deal predictors

Director of Technology

June 2026 – Present

Aperture Partners

Bloomington, IN

- Led the Technology vertical of a 60+ member 501(c)(3) student consulting organization named IU Student Organization of the Year twice, recruiting and directing a 15-consultant team across software, data, automation, and applied AI work
- Scoped incoming engagements with Stellantis, Cummins, and Toyota, defining deliverables, staffing plans, and the technical stack for each client engagement across web apps, internal tooling, AI integration, and workflow automation
- Designed and shipped the organization's website end to end, rebuilt its Slack workspace and onboarding flow, and wrote the technical curriculum (Git, React, REST APIs, LLM integration) taught to the incoming consultant class

PROJECTS

StudForge | Swarm Robotics World Compiler; Python, React Three Fiber, Qwen, Redis

June 2026

- Wrote the real-time 3D frontend in TypeScript and React Three Fiber: textured compiler-generated brick worlds with Midjourney MCP assets and rendered the swarm simulation live so users can inspect each scene as it compiles
- Engineered the Python compiler backend on typed Pydantic contracts, turning prompts into a schema-constrained SceneSpec and gating every layout through connectivity, collision, and coverage validation before canonical USD export

Onkos | Agentic Oncology Trial Matcher; Next.js, FastAPI, LangGraph, vLLM

April 2026

- Matched cancer patients to 29 active oncology trials with an agentic system that scores each against 20+ typed eligibility criteria and surfaces per-criterion disqualifying logic with cited rationale for clinician review
- Self-hosted MediX-R1, a 30B medical vision-language model, on an NVIDIA GH200 via vLLM, and orchestrated Kimi-K2 through LangGraph for agentic tool calls and PubMed RAG-grounded clinical reasoning over a corpus of trial protocols

HONORS & PROGRAMS

Grand Prize Finalist | UC Berkeley AI Hackathon

June 2026

UC Berkeley

Berkeley, CA

- Named a top 10 finalist out of 460+ teams and 1,600+ participants at the world's largest AI hackathon, run by Cal Hacks
- Pitched StudForge live on the main stage to venture capital judges and founders, placing 2nd in the Engineering Track

Regeneron Grand Prize, Best Use of AI for Clinical Trials | HackPrinceton

April 2026

Princeton University

Princeton, NJ

- Won the \$1,000 Regeneron track Grand Prize for Onkos against 600+ hackers at Princeton's flagship hackathon

Anthropic Track Runner-Up | Stanford TreeHacks

February 2026

Stanford University

Palo Alto, CA

- Admitted as 1 of 500 non-Stanford students from 15,000+ applicants (3%), one of the world's most competitive hackathons
- Demoed Redhue, a wildfire-spread dashboard, to Anthropic and a CAL FIRE chief as 1 of 20 projects picked from 400+

Selected Participant | Deloitte Compass Conference

August 2026

Deloitte University

Westlake, TX

- Selected as 1 of 300 from 7,000+ applicants (4% acceptance) for a fully funded 3-day national early-career conference
- Developed an expansion strategy for a simulated client using Deloitte's internal GenAI platform (Sidekick) for market research, evaluating financing and debt structure, and presented recommendations to partners and senior managers

Programs: PEAK6 Young Professionals, Expedition EY Technology Track, Goldman Sachs Possibilities Series

SKILLS

Business: Excel (financial modeling), PowerPoint, Microsoft Dynamics, SQL, SEC 10-K/10-Q analysis, M&A research

Engineering: Python, TypeScript, JavaScript, React, Next.js, AWS, PostgreSQL, Git

ML/AI: RAG pipelines, multi-agent systems, LLM fine-tuning, feature engineering, vision-language models
